Play Big IN76

InFocus

Some people just watch movies.

You, on the other hand, experience film. You critique cinema. You savor the sleeper hits. You secretly indulge in the occasional blockbuster. Fortunately, the InFocus Play Big IN76 does equal justice to the art-house indie and the glossy action flick — even the odd B-movie (not that anyone has to know about it). You get to take in every obscure detail the way it was intended to be seen on the big screen. Larger than life. In electrifying color and clarity. Enhanced by Pixelworks' DNX video-processing technology. And worthy of all the profound anticipation of a Hollywood premiere. If the IN76 can do all this for your beloved films, just imagine what it could do for exhilarating sports and gaming action.

You have an image to uphold.

The powerful appeal of the IN76 goes far beyond the magnificent picture it projects onscreen. Its sleek, futuristic, low-profile appearance adds a subtle sophistication to any room. Its unique swivel base simplifies tabletop setup and can be easily removed for ceiling mounting. Overall, the IN76 clearly displays your discriminating taste in both home-entertainment technology and fine design.

Learning curves are for school.

Remember the first time you programmed a VCR? Drove a clutch? Used your microwave? Now forget all those mind-bending experiences. You probably can't imagine how easy it is to turn on and use the IN76 projector. A few examples:

- Enjoy setup in a snap with a simple keypad and a new, full-featured remote control with patent-pending flashlight feature, direct source access, programmable presets and more.
- An icon-based menu allows you to quickly scroll and select your settings in your choice of 12 languages — without interrupting the show.
- Five user-selectable video sources enable impressive connectivity with a full range of devices, including VCRs, DVDs, component and RGB HDTV, EDTV and your game console of choice.

An easy to use, icon-based menu allows you to quickly scroll and select your settings.

Roll the credits.

The IN76 uses Pixelworks'™ DNX™ video-processing technology to dramatically improve the quality of video by combining multiple enhancement techniques to deliver clear, natural-looking standard and high-definition images. DNX™ technology utilizes sophisticated digital video processing to deliver a lifelike picture every time. Here are a few more of the outstanding features ensuring awe-inspiring home entertainment:

- Native 1280 x 720 resolution creates high-definition reality from any HD source.
- The 720p DarkChip2™ DLP® from Texas Instruments® provides increased depth and picture sharpness, as well as true blacks and whites.
- Thanks to 1000 video-optimized lumens with 3000:1 calibrated contrast ratio, you'll get brilliant, dramatic SMPTE (cinema-standard) brightness.
- The advanced six-segment color wheel delivers intense, precise colors that rival any movie theater screen.

Connecting to all your home entertainment devices is a snap. You'll be plugged in, powered up and projecting in no time flat.
